

Halesowen College

It's an exciting time for Halesowen college, and Fuselek Ltd are proud to support and provide the solutions needed to meet their high standards.

We delivered a brand new reception area which included the building, landscaping and design of the surrounding environment. Car parking and lighting helped to fully utilise the space available and create an impressive first impression of the college.

A complete refurbishment of block 3 incorporated many of the vast services Fuselek Ltd can offer. Our unique full turn key solution provided new class rooms, corridors and science lab, which were designed, wired, plastered and decorated to showcase Halesowen college's vision for the future.

Maintaining Services

Constant liaison with estate and facilities departments ensured the smooth running of Halesowen College whilst the works were in progress.

Out of normal working hours, weekends and bank holidays were a regular thing to minimise the risk to the public and students.

Health and safety is not just about being socially responsible and regard it as just as important as the achievement of any other key business objective
